Regulating Gas Liberalization Anton Ming-Zhi Gao,2010-10-20 This is the first book to analyze, in a comparative way, the detailed development of the unbundling and open access regimes across three continents. It is the author's contention that these two legal forms should be more widely implemented than they are at present. In each of five substantial chapters – on the United States, Europe, Japan, South Korea, and Taiwan – the author first focuses on the proposed or current laws and industrial practices on service, account, functional, legal and ownership unbundling and independent system operator, and then on those of different open access regimes (mainly including regulated and negotiated third party access), insofar as they

have been developed in each location. Using empirical evidence from Europe, the United States, and Japan that a well-formulated and comprehensive liberalization can bring about more advantages than disadvantages, he shows how well-designed unbundling and open access regimes may accomplish the following: • inject much-needed competition into gas exploration, exploitation, import, production, and retailing; • reform and re-regulate non-competitive sectors such as transportation, distribution, and storage; • balance potential conflicts between energy security and competition; and • support interests such as environmental protection, energy rights, safety, and consumer protection.

Diminishing Conflicts in Asia and the Pacific Edward Aspinall,Robin Jeffrey,Anthony J. Regan,2013 Since the publication of the 2005 Human Security Report, scholars and policy-makers have debated the causes, interpretation and implications of what the report described as a global decline in armed conflict since the end of the Cold War. Focusing on the Asia-Pacific region, this book analyses the causes and patterns of this decline. In few regions has the apparent decline in conflict been as dramatic as in the Asia-Pacific, with annual recorded battle deaths falling in the range of 50 to 75 percent between 1994 and 2004. Drawing on a wide range of case studies, this book looks at internal conflicts based on the mobilization of ethnic and nationalist grievances, which have been the most costly in human lives over the last decade. The book identifies structures, norms, practices and techniques that have either fuelled or moderated conflicts. As such, it is an essential read for students and scholars of international relations, peace and conflict studies and Asian studies.

It is replacing the West. The process is irreversible. With his trademark breadth and depth of knowledge and understanding of the region, based on over half a century of experience, study and deliberation, Ron Crocombe documents the early connections between Asia and the Pacific, details recent and continuing changes, and poses challenging theories about the future.--Publisher.

A Cautious New Approach Denghua Zhang,2020-03-20 'As a student of international relations and a former diplomat, Zhang brings the insights of a practitioner and the eye of scholar to explain why Chinese actors choose to engage in aid cooperation with traditional donors in the Asia-Pacific. This book is among the first to take a holistic approach to understanding the motivations of the many agencies involved in China's aid program, and it will challenge the expectations of many readers.' —Dr Graeme Smith, The Australian National University 'This book breaks new ground by examining a little-known dimension of China's foreign policy: trilateral aid cooperation. Denghua Zhang sets this highly original analysis in the context of the new assertiveness of Chinese foreign policy under Xi Jinping, the China International Development Cooperation Agency established in 2018, and the Belt and Road Initiative, which now serves as the framework for Chinese overseas aid and engagement. At a time when the debate in the West about the rise of China has intensified, not always knowledgeably, this book fills an important gap in our understanding of China in Southeast Asia and the Pacific.' —Dr Stewart Firth, The Australian National University 'This thoroughly researched work examines trilateral cooperation as a new and interesting aspect of China's growing international aid program, and as a window into the changing nature of that program as well as the wider foreign policy in which it is embedded. The broad themes and topics discussed are clearly significant, ultimately touching on one of the most important international issues of our time, the implications of the rise of China for a long-established Western-dominated international system.' —Prof. Terence Smith-Wesley, University of Hawai'i

In this paper, we examine recent data on yields for the most important crops grown in PNG, assess what yields might be achieved

based on productivity data from areas of Indonesia with similar growing conditions, and sketch where policy reforms could provide incentives and access to technologies to achieve higher crop yields by all farmers across PNG.

This book presents detailed case studies of thirteen such autonomies from around the world, in which noted experts on each outline the constitutional, legal and institutional frameworks as well as how these arrangements have worked in practice to protect minority rights and prevent secession of the territories in question.
